Fishing for Information?

The library is full of resources. Yes, Google is great - however, it is not always reliable. A lot of the information retrieved from the open web hasn't been evaluated. Who wants information that is wrong?

Here are 5 GREAT reasons why the HHS Library is better than Google:

1. Libraries are safe spaces

- Cyberbullying and trolling are real. Why engage with a difficult person? Libraries continue to be a quiet and welcome environment to work in.

2. You can't find everything on the Internet

- Published materials can easily be found using standard search engines. However, IT MAY NOT BE FREE. Who knows? It's a high probability that the library will already have a subscription to what you're trying to access.

3. The Internet lacks quality control

- Anyone can post anything at any time. The large amounts of information that is available can't be verified. Your library is the place where all information is true and accurate.

4. The Librarians will help you

- Not sure where to begin? Ask your Librarian. They have a wealth of knowledge and can take you in the right direction of what you're looking for. Can Google do that?

5. Libraries do not waste your time

- The internet is extremely distracting and will deter you from focusing. Just remember:

SOCIAL MEDIA IS NOT YOUR FRIEND!
